

Luxury homes in Ekali, Athens.

Owner	MIHANIKI SA
Capacity	53 homes, 270 inhabitants
Flow	85 m³/d
System	5 AX – 100
Results	BOD5= 10-15, S.S.= 10-15 ppm

In the region of Ekali, in the prefecture Attica is found the group of residences that was manufactured by Mechanics SA. It is constituted by 53 luxurious maisonettes and for the on-site sewage treatment AdvanTex[®] system was selected mostly because of the reliability and the effluent quality that provides. The agreement with the company was such of a system that would include 5 units AX-100 in its final stage, when all 53 maisonettes are ready.

Already they have been installed are functioning two units AX100. The project includes septic tank, 5 units AX-100., Electric panel with telemetry and compost filter.
